

## Sprint 2 Testing

Team 18

Sai Edupulapati, Akshaya Kumar, Shreya Sanapala, Visa Thongdee, Vidya Vuppala

---

### User Story #1

#### Test Case 1

##### A. Identification and classification

- Test Case 1001
- System: Account information, Phase: 1
- **Client deletes profile picture**
- Severity: 2

##### B. Instructions

1. On the profile page, click on the three dots settings button to access the drop down menu
2. Click on the edit profile button
3. Inside Edit Profile page, click on delete profile picture button
4. Confirm Delete choice by clicking on 'Delete' button on pop-up

##### C. Expected Result:

1. User profile picture becomes null image
2. Firebase profile picture information is deleted

# Edit Profile

## Test Case 2

### A. Identification and classification

- Test Case 1002
- System: Account information, Phase: 1
- **Client does not delete profile picture**
- Severity: 2

### B. Instructions

1. On the profile page, click on the three dots settings button to access the drop down menu
2. Click on the edit profile button
3. Inside Edit Profile page, click on delete profile picture button
4. Click on 'X' or background screen to cancel delete confirmation

### C. Expected Result:

1. User profile picture remains as is
2. Firebase profile picture information remains as is

## Edit Profile

## User Story #2

### Test Case 1

#### A. Identification and classification

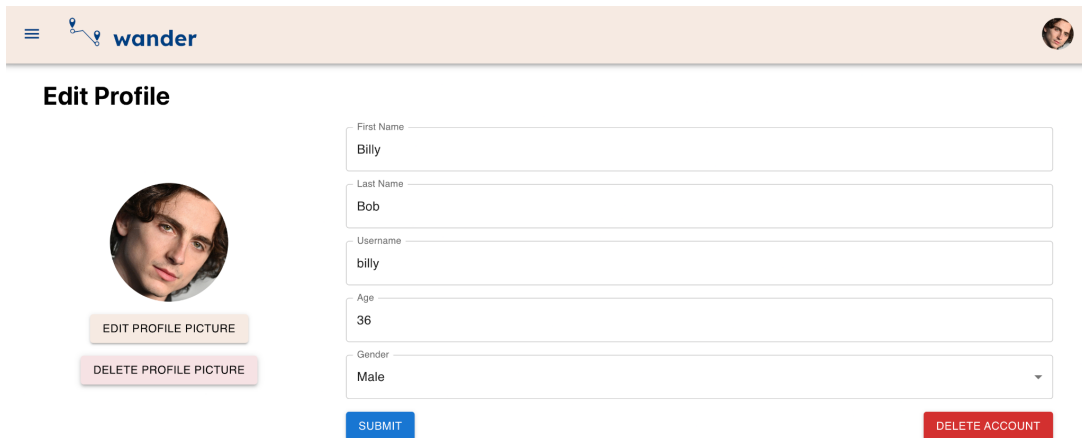

- Test Case 2001
- System: Account information, Phase: 2
- **Client update demographic information**
- Severity: 2

#### B. Instructions

1. On the profile page, click on the three dots settings button to access the drop down menu
2. Click on the edit profile button

#### C. Expected Result:

1. A page with editable text fields with demographic information (e.g. first name, last name, username, age, gender)

The screenshot displays the 'Edit Profile' interface. At the top, there is a navigation bar with a hamburger menu, the 'wander' logo, and a user profile picture. The main heading is 'Edit Profile'. On the left, there is a circular profile picture of a man with two buttons: 'EDIT PROFILE PICTURE' and 'DELETE PROFILE PICTURE'. To the right, there is a form with the following fields:

- First Name: Billy
- Last Name: Bob
- Username: billy
- Age: 36
- Gender: Male (dropdown menu)

At the bottom of the form, there are two buttons: 'SUBMIT' (blue) and 'DELETE ACCOUNT' (red).

### Test Case 2

#### A. Identification and classification

- Test Case 2002
- System: Account information, Phase: 2
- **Client update music preference information**
- Severity: 2

## B. Instructions

1. On the profile page, click on the three dots settings button to access the drop down menu
2. Click on the settings button

## C. Expected Result:

1. A page with editable text fields with demographic information (e.g. first name, last name, username, age, gender)

## Test Case 3

### A. Identification and classification

- Test Case 2003
- System: Account information, Phase: 2
- **Firebase backend updates with profile edits**

- Severity: 2

## B. Instructions

1. On the edit profile page
2. Change a demographic field (e.g. age and gender)

## C. Expected Result:

1. The changed demographic is changed in the firebase backend

## User Story #3

### Test Case 1

#### A. Identification and Classification

- Test Case: 3001
- System: Spotify Authentication
- Severity: 5

#### B. Instructions

1. Log into Wander with valid credentials.
2. Navigate to the “Profile” page.
3. Click on Connect to Spotify Button.
4. Refresh the page.

#### C. Expected Result

1. The images of the user’s top five artists are displayed.
2. The user’s top five tracks are logged to the screen.
3. The access and refresh tokens are recorded in Firebase.

### Test Case 2

#### A. Identification and Classification

- Test Case: 3002
- System: Spotify API Calls
- Severity: 3

#### B. Instructions

1. Repeat the same steps as outlined in Test Case 2.
2. Log out of Wander by clicking the “Logout” button at the bottom.
3. Log back into same Wander account and navigate to the “Profile” page.

### C. Expected Result

1. The user's top artists should still be recorded, even without having to click the "Connect to Spotify" button.
2. The user's top tracks are also listed in the same way.
3. The backend should not update anything/keep the tokens the same.

## Test Case 3

### A. Identification and Classification

- Test Case: 3003
- System: Spotify Disconnection
- Severity: 2

### B. Instructions

1. Log into a Wander account that is already connected to Spotify.
2. Navigate to the Profile page.
3. Click on the "Disconnect from Spotify" button.
4. Refresh the page.

### C. Expected Result

1. The user statistics/spotify information section of the profile page should disappear.
2. The access and refresh token fields should be cleared in Firebase, effectively ending our communication with the user's Spotify account.

## User Story #4

### Test Case 1

#### A. Identification and Classification

- Test Case: 4001
- System: Quiz
- **Client submits selected quiz answers**
- Severity: 3

#### B. Instructions

1. Click the Create New Trip Button on the homepage and submit the source and destination fields.
2. Select desired answers from the quiz while navigating with the Next button and Prev Buttons.
3. Select Submit Quiz to finalize quiz answers.

#### C. Expected Result

1. The user is able to navigate through the questions of the quiz with the Next and Prev buttons.
2. When the user visits a question they have already answered, their previous selection is populated.
3. When the user submits their quiz, their results should be populated in Firebase.

### Test Case 2

#### A. Identification and Classification

- Test Case: 4002
- System: Quiz
- **Client restarts the quiz**
- Severity: 3

## B. Instructions

4. Click the Create New Trip Button on the homepage and submit the source and destination fields.
5. Select desired answers from the quiz while navigating with the Next and Prev buttons.
6. Select Start Over to restart the quiz.

## C. Expected Result

4. The user is able to navigate through the questions of the quiz with the Next and Prev buttons.
5. When the user submits their quiz, their results should be populated in Firebase.

## Test Case 3

### A. Identification and Classification

- Test Case: 4001
- System: Quiz
- **Client moves to a new question without selecting a quiz answer**
- Severity: 3

## B. Instructions

7. Click the Create New Trip Button on the homepage and submit the source and destination fields.
8. Do not select an answer in the current question and click the Next button.

## C. Expected Result

6. When the user clicks next without selecting an answer, they will receive an alert that asks them to select an answer before moving to the next question.

# User Story #5

## Test Case 1

### A. Identification and classification

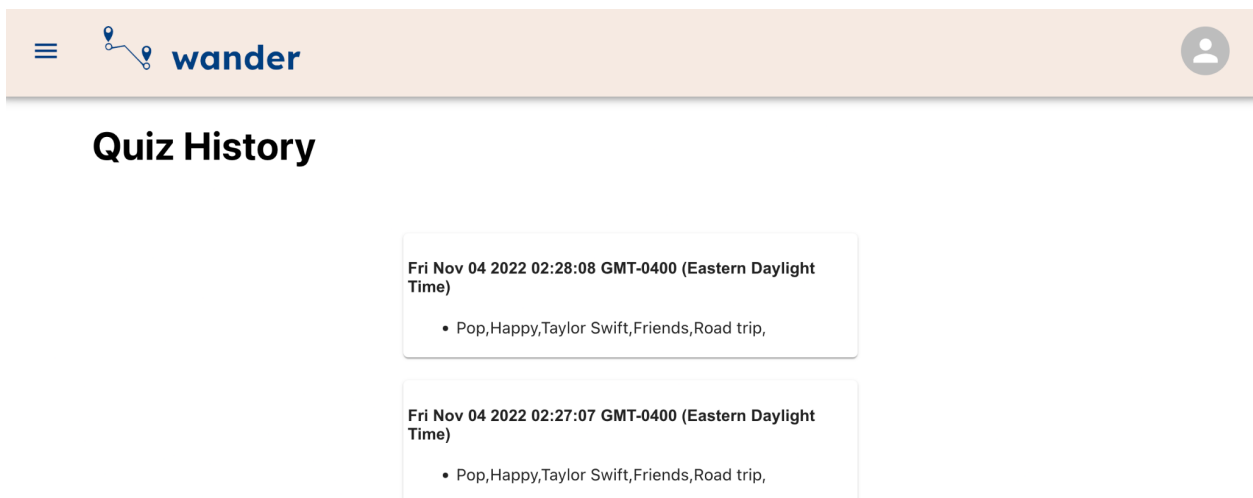

- Test Case 5001
- System: Account information, Phase: 1
- **Client Accesses past quiz history**
- Severity: 2

### B. Instructions

1. Navigate to the Profile page from the sidebar or by clicking the profile picture on the top right of the screen
2. On the profile page, click on the past quiz history button

### C. Expected Result:

1. The past quiz history button should navigate to a quiz history page with their past quiz answers populated in chronological order..

## User Story #6

### Test Case 1

#### A. Identification and Classification

- Test Case: 4001
- System: Quiz History
- **Client deletes quiz history**
- Severity: 3

#### B. Instructions

1. Navigate to Profile
2. Click the Past Quiz Preferences Button
3. Click the Delete History Button

#### C. Expected Result

1. The quiz entries will be removed from the page.
2. The quiz entries associated with the user will be deleted from Firebase.

### Test Case 2

#### A. Identification and Classification

- Test Case: 4001
- System: Quiz History
- **Client attempts to delete empty quiz history**
- Severity: 3

#### B. Instructions

1. Navigate to Profile
2. Click the Past Quiz Preferences Button
3. Click the Delete History Button

### C. Expected Result

1. There are no quiz results populated on the page.
2. The Delete History Button should have no response and it is disabled/greyed out.

#### Quiz History

**You have no quizzes in your history**

DELETE HISTORY

## User Story #7

### Test Case 1

#### A. Identification and classification

- Test Case: 7001
- System: Simple
- Client is able to set preferences
- Severity 1

#### B. Instructions

1. On the profile page, click on settings to view the toggle preferences

#### C. Expected Result:

1. The toggle options should be on the same page as the other settings
2. The toggle can switch between the two options on the UI

### Settings

## Test Case 2

### A. Identification and classification

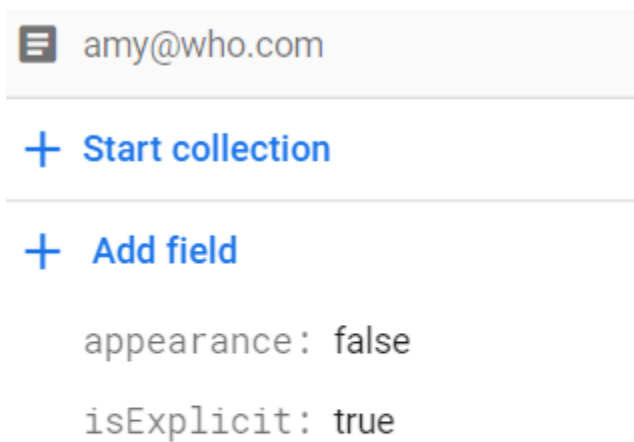

- Test Case: 7001
- System: Simple
- Client is able to save their preferences
- Severity 1

### B. Instructions

1. Choose desired option for two preferences: Explicit Content and light vs dark mode

### C. Expected Result:

1. Firebase should store user preferences in two fields: appearance and explicit

## User Story #8

### Test Case 1

#### A. Identification and classification

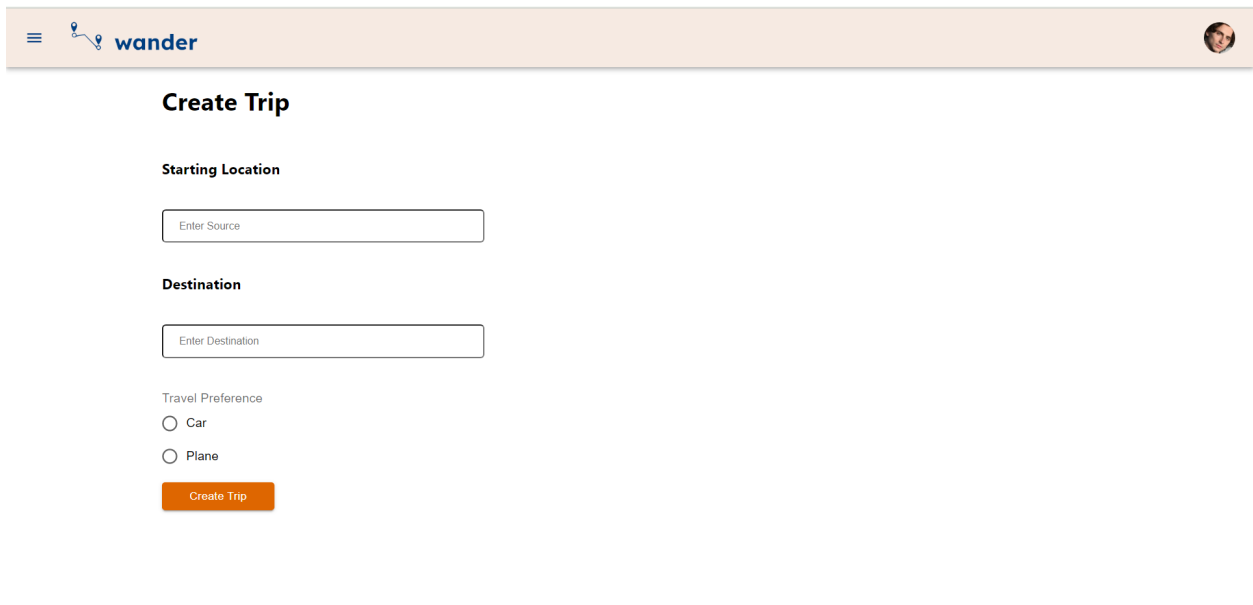

- Test Case 8001
- System: Trip creation, Phase: 2
- **Client creates new trip – UI**
- Severity: 2

#### B. Instructions

1. On the home page, click on ‘Create New Trip’ button

#### C. Expected Result:

1. A page with text field to enter starting location

### Create Trip

**Starting Location**

Create Trip

### Test Case 2

#### A. Identification and classification

- Test Case 8002
- System: Trip creation, Phase: 2
- **Client creates new trip – Autocomplete**
- Severity: 2

#### B. Instructions

1. On the home page, click on ‘Create New Trip’ button
2. Begin typing in Starting Location’ text field

#### C. Expected Result:

1. 5 suggested locations based on user input appearing below text field

#### **Starting Location**

New York, NY, USA  
New Orleans, LA, USA  
New Buffalo, MI, USA  
New Jersey, USA  
New Lenox, IL, USA

### Test Case 3

#### A. Identification and classification

- Test Case 8003
- System: Trip creation, Phase: 2
- **Client creates new trip – Backend**
- Severity: 2

#### B. Instructions

1. On the home page, click on 'Create New Trip' button
2. Begin typing in Starting Location' text field
3. Click 'Create Trip' button

#### C. Expected Result:

1. User input for Starting Location is stored in Firebase backend

## Test Case 2

### A. Identification and classification

- Test Case 12002
- System: Trip creation, Phase: 2
- **Client edits trip – UI**
- Severity: 2

## B. Instructions

1. On the home page, click on embedded Trip card within Current Trip card

## C. Expected Result:

1. A page with Radio Button options to edit travel preferences

The screenshot shows the 'Edit Trip Details' page. The header is light orange with the Wander logo on the left and a user profile icon on the right. The main content area is white. The title 'Edit Trip Details' is centered. Below the title, there are three sections: 'Starting Location' with a text input field labeled 'Enter New Source', 'Destination' with a text input field labeled 'Enter Destination', and 'Travel Preference' with two radio button options: 'Car' and 'Plane'. At the bottom of the form is an orange button labeled 'Edit Changes'.

## Test Case 3

### A. Identification and classification

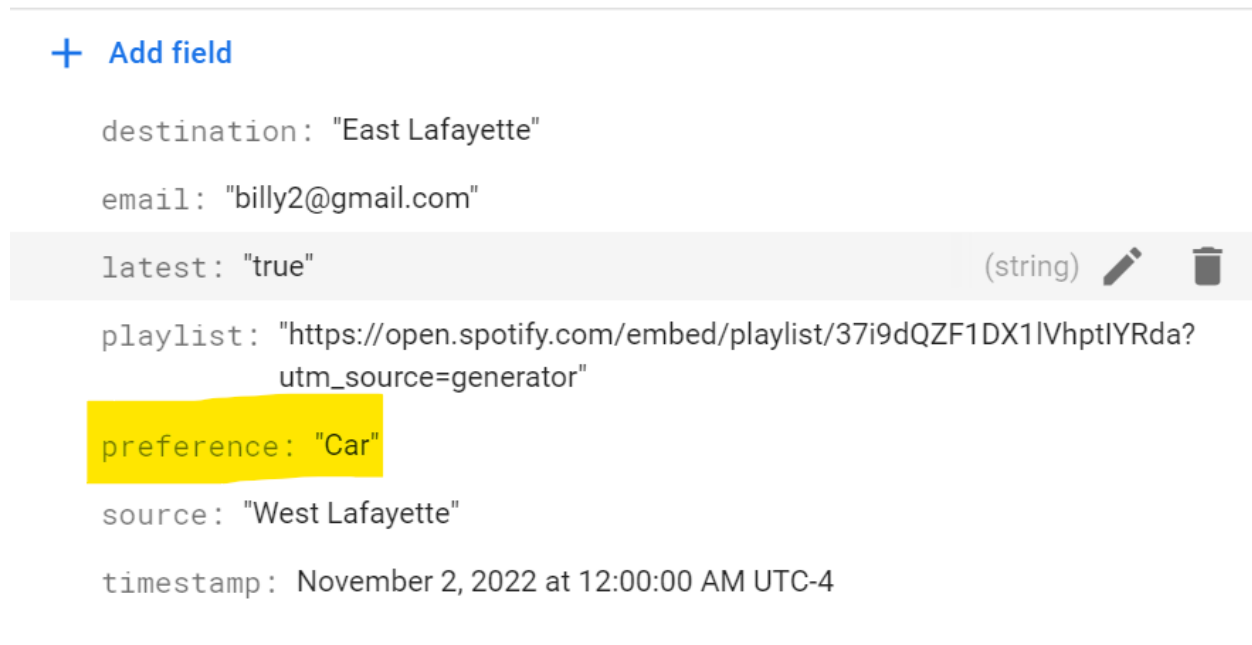

- Test Case 10003
- System: Trip creation, Phase: 2
- **Client creates new travel preference– Backend**
- Severity: 2

### B. Instructions

1. On the home page, click on 'Create New Trip' button
2. Select travel preference option
3. Click 'Create Trip' button

#### C. Expected Result:

1. User selection for travel preference is stored in Firebase backend

### Test Case 4

#### A. Identification and classification

- Test Case 10004
- System: Trip creation, Phase: 2
- **Client edits travel preference– Backend**
- Severity: 2

#### B. Instructions

4. On the home page, click on embedded Trip card within Current Trip card
5. Select new travel preference option

6. Click 'Edit Changes' button

### C. Expected Result:

2. New user selection for travel preference is stored in Firebase backend
